### 4 piece set up - tech specifications - V1

# KINGS OF LEON TRIBUTE: THE FOUR KICKS

#### **Overall Sound Profile**

In terms of setup, The Four Kicks are a 4 piece band comprised of rhythm guitar, bass guitar, lead guitar and drums, with lead and 2x backing vocals, designed to imitate KoL's sound.

Music from earliest 2 albums have a raw feel, whilst later albums have more of a stadium rock sound, utilising expansive reverbs to create the feeling of space.

The relationship between kick drum & bass guitar is vital to KoL's music. Space should be given in mix to bass guitar as the basslines tend to be more interesting than just playing root notes – kick drum should be felt as well as heard.

#### Sound Examples

To give you an idea of the sound we strive to emulate:

KoL @ iTunes Festival - (link) Very polished performance, note big snare sound, vocal sound and over all mix.

Molly's Chambers - iTunes Festival – (link) Same show, but an example of an older song – more dry sounding, reverb on snare reduced.
